### EDUCATION

- 2024-2026  
• Master of Computer Applications (MCA) Pursuing DE PAUL INSTITUTE OF SCIENCE AND TECHNOLOGY, ANGAMALY
- 2021-2024  
• Bachelor of Computer Applications (BCA) 81% NAIPUNNYA INSTITUTE OF MANAGEMENT AND INFORMATION TECHNOLOGY, PONGAM
- 2019-2021  
• Plus Two 92% ST ANTONY'S HSS, MALA
- 2018-2019  
• SSLC 100% SCGHSS MALA

### TECHNICAL SKILL

- Languages : C, Python, Java,SQL, PHP
- Web Development : HTML, CSS, JavaScript (Basic)
- Tools : Visual Studio Code, Microsoft Office
- Version Control : Git

### SKILLS

- Result oriented
- Self discipline
- Enthusiastic
- Industrious
- Collaborative
- Commercially driven

### PROFESSIONAL SUMMARY

Highly motivated and results-driven Software Developer Fresher with a strong academic background.I possess a solid foundation in Core Java , OOP , and Data Structures, with proven ability to build and document clean, efficient RESTful backend services using Spring Boot and MySQL. Key technical proficiencies include Java, PHP, C, and Python , demonstrated through implementing a crucial Talent Search Engine module in the TalentConnect Platform (Spring Boot/Java) and developing a comprehensive Evento-Fest Management System (PHP/MySQL). Committed to collaborative development , self-discipline , and adopting best practices like Git.

### PROJECT EXPERIENCE

#### Evento-Fest Management System

PHP,HTML,CSS,JAVASCRIPT,MySQL

- Developed a comprehensive, modular web-based solution to streamline the entire lifecycle of college fests. The technical architecture was built on a dynamic stack utilizing PHP for robust server-side scripting and business logic execution. The system implemented critical backend functions, including secure user registration, integrated payment processing, and centralized event management.

#### TalentConnect Platform

SPRINGBOOT, JAVA, HTML, CSS, JAVASCRIPT, MySQL

- The TalentConnect Platform is a system developed to connect talent (such as actors, singers, and writers) directly with casting professionals. My main contribution was implementing a crucial Talent Search Engine module for the backend.
- This search engine included creating logic to filter and retrieve talent data based on professional requirements, ensuring accurate results for casting professionals.I was also responsible for building the functionality to automatically prepare and generate reports on search results by integrating with the platform's database (using SQL).
